Cognitive Interaction Toolkit - Support #288

Job names need to contain a version number, e.g., 0.2 or "nightly" > DOCUMENTATION

Target version:	Toolkit 0.1	**Spent time:**	0.00 hour

Description

In order to create semantically meaningful names for distribution files they need to include either a version, e.g., 0.1 or the "nightly" label, that indicates "current development build".

If you ommit those identifiers the generator will *silently* fail to create there according jobs JOBS.

This needs to be documented somewhere!
