

XTT - eXtensible Task Toolkit - Feature #132

Capability query mechanism

2012-12-04 11:27 - Ingo Lütkebohle

Status:	New	Start date:	2012-12-04
Priority:	Normal	Due date:	
Assignee:	Ingo Lütkebohle	% Done:	50%
Category:	toolkit	Estimated time:	16.00 hours
Target version:	3.3		
Description A capability query mechanism would make it possible to enhance the protocol, e.g. to detect servers that have crashed automatically through pinging after a timeout, without losing backwards compatibility.			

Associated revisions

Revision 2734 - 2012-12-05 10:40 - Ingo Lütkebohle

Implement ServerInfo and transport (refs #132).
