

RML - RobotMetaLogger - Support #144

PYTHONPATH / LIBDIR unclear

2013-02-19 00:25 - Florian Lier

Status:	New	Start date:	2013-02-19
Priority:	Normal	Due date:	
Assignee:	Florian Lier	% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:		Spent time:	0.00 hour
Description			
If you configure RML using ./configure --prefix=/tmp (for instance) /tmp/bin/rml init will fail due to the std path for python libs, e.g.:			
flier@m0thership:~/Projects/Ongoing/RML/data\$ /tmp/bin/rml init			
Traceback (most recent call last):			
File "/tmp/bin/rml", line 4, in <module>			
import pkg_resources			
File "/usr/lib/python2.7/dist-packages/pkg_resources.py", line 2815, in <module>			
working_set.require(__requires__)			
File "/usr/lib/python2.7/dist-packages/pkg_resources.py", line 690, in require			
needed = self.resolve(parse_requirements(requirements))			
File "/usr/lib/python2.7/dist-packages/pkg_resources.py", line 588, in resolve			
raise DistributionNotFound(req)			
pkg_resources.DistributionNotFound: RobotMetaLogger==0.4			
Shall we introduce a \$prefix variable? Import paths on runtime using sys.append.path() ? Extend \$PYTHONPATH ?
