

XTT - eXtensible Task Toolkit - Feature #20

Reject (instead of ignore) invalid messages

2011-10-16 13:18 - Ingo Lütkebohle

Status:	New	Start date:	2011-10-16
Priority:	Normal	Due date:	
Assignee:	Ingo Lütkebohle	% Done:	0%
Category:		Estimated time:	8.00 hours
Target version:	2.0		

Description

A number of common communication errors can be detected automatically and should be communicated back to the sender (instead of being ignored, as they currently are):

- use of transitions that are not allowed for the sender (e.g., a client sending an "update_failed" notification)
- failure in unpacking the goal specification message
