XTT - eXtensible Task Toolkit - Feature #20

Reject (instead of ignore) invalid messages

2011-10-16 13:18 - Ingo Lütkebohle

Status: Start date: New 2011-10-16 **Priority:** Normal Due date: Assignee: Ingo Lütkebohle % Done: 0% Category: **Estimated time:** 8.00 hours Target version: 2.0

Description

A number of common communication errors can be detected automatically and should be communicated back to the sender (instead of being ignored, as they currently are):

- use of transitions that are not allowed for the sender (e.g., a client sending an "update_failed" notification)
- failure in unpacking the goal specification message
