

Cognitive Interaction Toolkit - Support #246

Does "extra-requires" and "extra-provides" create according jobs?

2014-05-14 13:22 - Florian Lier

<div>Description</div> <p>As an Example I'd like to choose the fsmt.project. This project requires "setuptools", "pyscxml" --- which is in return provides "setuptools", "pyscxml" see:</p> <p>http://opensource.cit-ec.de/projects/citk/repository/changes/projects/fsmt.project?rev=master http://opensource.cit-ec.de/projects/citk/repository/changes/projects/pyscxml.project?rev=master</p> <p>When creating jobs, using the build-generator (fsmt is referenced in the oncilla-sim-0.2 distro), a pyscxml job is <i>not</i> created automatically. I cannot recall if this has been the case at some point. For now, I added pyscxml to the distro. Can anyone comment, test this?</p>			

History

- #1 - 2014-05-14 13:22 - Florian Lier
- Subject changed from Does "extra-requires" and "extra-provides" create accroding jobs? to Does "extra-requires" and "extra-provides" create according jobs?
- #2 - 2014-05-14 14:56 - Jan Moringen
- This kind of job creation for the dependency closure does not happen automatically. However, an error should be displayed if an upstream project is not part of the distribution.
- #3 - 2014-05-14 14:58 - Florian Lier
- Status changed from New to Closed

Thanks for clarification!
