Cognitive Interaction Toolkit - Bug #354

poor / no error feedback of build-generator

2014-12-17 12:23 - Robert Haschke

Status:	Closed		Start date:	2014-12-17
Priority:	Normal		Due date:

Description

build generator silently fails to generate jenkins jobs (empty build script) if, for example, dollars ($) are not correctly prefixed in the recipe. E.g. using shell syntax $(var).

build generator silently fails if checkout/clone of repo fails due to missing permissions.

error position shouldn't be given emacs style (char location), but line number + column number.

Duplicate of #261.

> build generator silently fails if checkout/clone of repo fails due to missing permissions.

Is this like #345? Otherwise, please attach reproducible test case.
