Any feedback?

I deleted a ":" in the flobi-core stuff on purpose. Now the output is as follows:

```
[fli@thorium]~/homes/fli/dev/citk/citkac/citk.tools/citk-access-check
[17:12]$ python bin/citkac.py /homes/fli/dev/CITK/dist/ lsp-famula-nightly.distribution
```

```
!! THIS CLIENT IS INTENDED TO TEST NON-INTERACTIVE SCM CHECKOUTS !!
!! IT USES CREDENTIALS STORED IN ~/.netrc OR ~/.subversion FILES !!
```

```
>> Processing Distribution file /homes/fli/dev/CITK/dist/lsp-famula-nightly.distribution
>> For now, ONLY GIT and SUBVERSION checking is supported. Sorry.
```

Some code refactoring to allow printing of erroneous file name.

Added escaping of tabs in JSON string literals (additional to newlines), which eventually caused the error.

Thx for the modification!
