

## IPAACA - Feature #488

### ipaaca\_pb2 should lie inside ipaaca package and in the PYTHONPATH

2016-09-12 13:24 - Hendrik Buschmeier

<b>Status:</b>	New	<b>Start date:</b>	2016-09-12
<b>Priority:</b>	Normal	<b>Due date:</b>

<b>Target version:</b>			
<b>Description</b>			
<p>ipaaca is currently not self-contained as the protobuf generated ipaaca_pb2.py file resides outside the ipaaca package. Although it is sufficient to just copy it into the package, the including files should import it as ipaaca.ipaaca_pb2 instead of just ipaaca_pb2.</p> <p>What needs to be done:</p> <ul style="list-style-type: none"><li>• Change build process so that it puts ipaaca_pb2 in the right place.</li><li>• Change ipaaca sub-modules to import ipaaca.ipaaca_pb2 instead of just ipaaca_pb2.</li></ul>
